RESOLVING, Executive Partner of BIM World, presents a 100% virtual special edition

www.resolving-bim-world-digital.com

Platform opens from September 24th for pre-registration.

Access to Live Workshops on October 7th and 8th, from 9am to 6pm.

- As a specialist in the digitalisation of construction and real estate, RESOLVING has chosen to convert its presence at BIM World into a 100% virtual site.
- On 7th & 8th October, the online event platform will allow users to discover and interact with RESOLVING's new products and practical use-cases from its customers.

Save the date so you don't miss out on the RESOLVING DIGITAL EXPERIENCE.

The choice of a digital event on the occasion of BIM WORLD, of which RESOLVING is traditionally a sponsor (Executive Partner), makes it possible to **share and exchange with total peace of mind**, avoiding the organizational hazards and risks surrounding public meetings related to COVID-19.

"The current health situation is forcing all companies to review their operational methods and ensure they minimize risks for their employees and customers. For BIM World, we chose to make **a complete leap into the digital world** by bringing to the Web a content program that reproduces what we would have presented on our stand. Our consultants, clients and invited partners will not be physically present at the show at the Porte de Versailles, but will be there online to animate remote sessions and answer questions from our visitors during the 2 days", explains Hakim Fagoul, Director France of RESOLVING.

RESOLVING brought to the Web in a dedicated graphical environment a permanent program of conferences, FAQ workshops and demonstrations, and introduced all the possibilities for interaction and meetings with the RESOLVING speakers and teams.

This virtual event takes place with the support and in the presence of RESOLVING's customers and partners: **BatiRIM®, ENGIE Solutions, Nexity, Paris-Ouest Construction, Rabot Dutilleul Construction and Spie batignolles.**

During these 2 days, meet our experts around 5 themes:

- RESOLVING Innovations
- Digitalisation of internal company processes
- Digitalisation of general contracting projects
- Digitalisation of projects for a project owner
- Digitalisation in deconstruction and circular economy

About RESOLVING

RESOLVING offers a collaborative cloud-based platform to manage data and processes for the construction and real estate industries. Its technologies cover the entire lifecycle of assets, from the Design and Construction phases to the Operation and Deconstruction phases.

Teams collaborate around plans, BIM models, documents and all project data by integrating a suite of modules adapted to the specific needs of their business: Document Management, Site Monitoring, BIM Review, Control Forms, Inspections and more. Asset data and processes are centralised on a single digital base, accessible in mobility (tablet and smartphone) and from the office via a Web interface. The platform connects with its customers' information systems via APIs to share data.

RESOLVING, a digital accelerator for the real estate and construction industries, was created in 2003. Its head office is located in Lyon, with offices in Paris, London and Hong Kong.
